Q: Using min() on a vector of dates fails (error: no method) I need to find the minimum value of a vector of dates (in my case days of the month) but it fails. In case this isn't clear, I will reproduce my error here: library(lubridate) d 1. Field of the Invention The present invention relates to an imaging apparatus and a method of controlling the same. 2. Description of the Related Art In recent years, a video camera is often used not only for taking still pictures, but also for reproducing a moving picture. In reproduction of a moving picture, it is preferable that a subject is reproduced while free from disturbance from movement or the like of the subject. To this end, a technique has been proposed of preventing an image shake caused by hand shake or the like during reproduction. As such a technique, there is a moving picture mode that cancels an image shake due to camera shake caused when an image is taken. Japanese Patent Laid-Open No. 2000-235908 discloses a camera which is provided with a monitor display section which indicates a subject to be taken, and which changes an arrangement position of the subject in accordance with a result of a shake detection performed while the subject is displayed on the monitor display section. However, Japanese Patent Laid-Open No. 2000-235908 does not disclose the arrangement position of a subject to be taken in a moving picture mode. It is difficult to view the subject displayed on the monitor display section in a moving picture mode. Accordingly, a user tends to look for the subject displayed on the monitor display section in a 82157476af
